

Patient ID	10036746	Patient Name	Saeed Mohammed Rashed Gharib Aljahoori
Age / Gender	43Y 10M / Male	Referring Physician	Dr Brian Mtemererwa
DOB	1982-08-02	Procedure	ULTRASOUND THYROID
Study Time	2026-06-20 12:15:39	Reported DateTime	2026-06-20 13:56:17

ULTRASOUND OF THYROID

FINDINGS:

Right lobe of thyroid gland, measures 4.6 x 1.6 x 1.6 cm. (volume : 6.5 ml).

Left lobe of thyroid gland measures 4.4 x 1.8 x 1.6 cm. (volume : 6.8 ml).

Isthmus measures 3.2 mm.

Normal thyroid gland size with diffuse heterogenous echotexture.

No discrete focal lesion identified.

No calcification.

Normal gland vascularity by color doppler noted.

No retros ternal extension seen.

Bilateral parotids and submandibular glands are normal in size and echotexture. No dilatation of ductal system noted.

Major blood vessels of the neck appear normal.

Multiple RT cervical lymph nodes seen, largest about 2.2 cm with preserved fatty hilum likely reactive.

IMPRESSION:

Normal thyroid gland size with diffuse heterogenous echotexture as described.

Features may suggest diffuse thyroid disease (e.g. thyroiditis).

RECOMMENDATIONS:

Clinical and (thyroid function test & antibodies) correlation advised.

Dr. Enas Elsayed Eldin,
Radiologist.
