

RADIOLOGY EXAMINATION REPORT

Patient Name : Ayla Maria Kabak

MRN : 10121570

Age/Sex : 10Y/F

Requested By : Dr. Teeb Al Awadi

Procedure Date : 20-06-2026 12:55:45

Facility : MEDCARE HOSPITAL

ULTRASOUND THYROID

- Right lobe of thyroid measures 1.07x1.39x3.11cm.
- Left lobe measures 0.97 x 1.21 x 2.69 cm.
- Isthmus measures 1.2mm.
- Slightly heterogeneity in echotexture seen in inferiormost aspect of both lobes .
- No retrosternal extension.
- The sub-mandibular and parotid glands are normal in size and echogenicity. No focal lesions.
- IJV and carotids normal.
- No significantly enlarged cervical lymph nodes.

IMPRESSION:

- **Slight heterogeneity in echotexture seen in inferior most aspect of both lobes of thyroid . No distinct focal lesions seen . Suggested correlation with clinico lab parameters to rule out early thyroiditis and interval follow up for monitoring .**
