

RADIOLOGY EXAMINATION REPORT

Patient Name : Ahmed Said Mohamed Elfeshawy
MRN : 10512905 Age/Sex : 45Y/M
Requested By : Maha Osman Dr. Procedure Date : 20-06-2026 18:02:44
Facility : MEDCARE HOSPITAL

ULTRASONOGRAPHIC EXAMINATION OF THE THYROID GLAND USING LINEAR PROBE (11 MHz) REVEALED:

- Both thyroid lobes are normal in size with diffuse rather coarse texture where tiny cystic changes are seen in both lobes, an echogenic nodule measuring 3.4mm x 3.4mm is seen in the right lobe, no foci of calcifications, criteria is going with TR3 . the thyroid isthmus is displaying a simple cyst measuring 5.2mmx 1.7mm (TR1). Normal vascularity of the gland on color flow mapping.

- No retro-sternal extensions.

- The carotid sheaths are normal on both sides.

- No enlarged cervical lymph nodes.

Opinion:

Picture of diffuse thyroiditis with right lobe TR3 nodule and isthmus cyst (TR1) for FOLLO UP

TIRADS SCORING SYSTEM

- **composition:** (choose one)
 - 0 cystic or completely cystic *: 0 points
 - 0 spongiform *: 0 points
 - 0 mixed cystic and solid: 1 point
 - 0 solid or almost completely solid: 2 points
- **echogenicity:** (choose one)
 - 0 anechoic: 0 points
 - 0 hyper- or isoechoic: 1 point
 - 0 hypoechoic: 2 points
 - 0 very hypoechoic: 3 points
- **shape:** (choose one) (assessed on the transverse plane)
 - 0 wider than tall: 0 points

- 0 taller than wide: 3 points
- **margin:** (choose one)
 - 0 smooth: 0 points
 - 0 ill-defined: 0 points
 - 0 lobulated/irregular: 2 points
 - 0 extra-thyroidal extension: 3 points

Any and all findings in the final category are also added to the other four scores.

- **echogenic foci:** (choose one or more)
 - 0 none: 0 points
 - 0 large comet-tail artifact: 0 points
 - 0 macrocalcifications: 1 point
 - 0 peripheral/rim calcifications: 2 points
 - 0 punctate echogenic foci: 3 points

Scoring and classification

- **TR1:** 0 points
 - 0 benign
- **TR2:** 2 points
 - 0 not suspicious
- **TR3:** 3 points
 - 0 mildly suspicious
- **TR4:** 4-6 points
 - 0 moderately suspicious
- **TR5:** ≥7 points
 - 0 highly suspicious

Recommendations

- **TR1:** no FNA required
- **TR2:** no FNA required
- **TR3:** ≥1.5 cm follow up, ≥2.5 cm FNA
 - 0 follow up: 1, 3 and 5 years
- **TR4:** ≥1.0 cm follow up, ≥1.5 cm FNA
 - 0 follow up: 1, 2, 3 and 5 years
- **TR5:** ≥0.5 cm follow up, ≥1.0 cm FNA
 - 0 annual follow up for up to 5 years

For diagnostic purposes, this report should not be used in isolation, but in conjunction with clinical history & findings and other investigative modalities
