

Patient Name : Maryam Khalid Muhammad Arif
 MRN : 10522120 Age/Sex : 38Y/F
 Requested By : Dr. Abdul Jabbar Procedure Date : 20-06-2026 18:26
 Facility : MEDCARE HOSPITAL

ULTRASOUND THYROID

INDICATION: Follow up ultrasound. A previous ultrasound 14 /0 6/2025 was compared with.

□ **Left lobe** comparatively bulky.

A 30 x 21.3 x 13 mm (compared to 30 x 18 x 14 mm) mixed echogenicity predominantly isoechoic solid wider than tall nodule with hypoechoic halo showing few internal hypoechoic and hyperechoic areas without calcifications. Significantly raised vascularity in the nodule and multiple anechoic spaces of ectatic vessels noted near upper pole of the nodule. (total points 3), TIRADS 3, Adv: follow-up.

□ **Right lobe.**

An 11.7 x 8.5 x 6.5 mm (compared to 8.8 x 7.5 x 10 mm) mixed echogenicity predominantly hypoechoic solid, wider than tall nodule with few tiny internal cystic spaces/ some spongiform components and without calcification in the posterior aspect of the mid-lower pole of the right lobe (total points 4), TIRADS 4, Adv: follow-up.

□ No significant adjacent lymphadenopathy.

IMPRESSION:

□ **Hypervascular** nodule in left lobe- TIRADS 3. Suggested follow-up. Almost stationary as compared to the last study.

□ Nodule in right lobe of thyroid with- TIRADS 4. Suggested follow-up. The size is minimally increased as compared to the last study.
